

Everyone can afford a CAS, SMS and IPTV with Cryptoguard

Cryptoguard is exhibiting at IBC 2011 3:C53

Cryptoguard will follow up the success from the Anga trade show with exhibiting at IBC as a key provider of CAS, SMS and IPTV solutions. Please visit our booth #3.C53 to understand how our, easy to use and inexpensive products can change your business.

IBC is the premier annual conference and exhibition for professionals engaged in the creation, management and delivery of entertainment and media content worldwide. IBC is at the cutting-edge of new technology in the rapidly evolving electronic media industry.

A competitive advantage is generated by the integration of our proven IP solutions with our DVB conditional access technology – as well as the embedded Subscriber management system. The enhanced solution provides support for broadcast (one-way) as well as DVB hybrid networks from a unified head-end, with a single point of integration.

News from Cryptoguard:

- Can be used for HBO, Viasat and Canal Digital content
- Secure chipset pairing
- CI+ modules
- A number of integrated Play services including VIAPLAY
- Inventive business model makes our solutions affordable for everyone
