
European standard CAS with affordable Indian prices

Adopt Cryptoguard CAS to secure content for your Cable TV network

With the news of Pan India Cable TV Digitalisation made mandatory by Government of India, and completing the first phase by June 2012, Cryptoguard comes up with CAS solution along with numerous added value services in the package.

After the initial soft launch at SCAT India show In Mumbai, Cryptoguard will jump into bandwagon of key provider of CAS, SMS and IPTV solutions. SAARC Region's largest CATV Show "Cable Show 2012" would be the best platform to showcase the complete CAS system.

Please visit stand No. 26-32 at Cable show , Kolkata, Netaji Subhash Indoor stadium on 12th , 13th and 14th January and then upon at Booth no. B 13 at COA Megafest, Kochi Kerala on 19th , 20th and 21st Jan interact with Mr. Himanshu Sharma and Ms. Shruti Sharma to understand how our, easy to use and inexpensive products can change your business.

Cable Show 2012 is the premier annual exhibition and Seminar for professionals engaged in the CATV products. Spanning from North of India to South East of India, this show caters to Bangladesh and Nepal Market as well.

Cryptoguard- protects and secures content with a competitive advantage which is generated by the integration of our proven IP solutions with our DVB conditional access technology – as well as the embedded Subscriber management system. The enhanced solution provides support for broadcast (one-way) as well as DVB hybrid networks from a unified head-end, with a single point of integration.

News from Cryptoguard:

- Secure chipset pairing
- Fingerprinting
- CI+ modules
- A number of integrated Play services including VIAPLAY
- Inventive business model makes our solutions affordable for everyone
